

## Jeep® JK / TJ Hood Scoop

1. Installation should be done when temperature is between 65° - 110° F (18°-43° C). Clean mounting surface with rubbing alcohol. Avoid areas to which the product will not be adhered. **THIS MUST BE DONE FOR ADHESIVE TAPE TO PROPERLY STICK. FAILURE TO CLEAN COULD RESULT IN POOR ATTACHMENT AND FAILURE OF PRODUCT TO STAY ATTACHED.** Allow areas to dry completely before installing.
2. Test fit the Hood Scoop to the vehicle before removing the plastic backing film (figure 2a). This will aid in aligning the piece properly before securing with the two sided 3M® tape. Once positioning has been determined, it is helpful to mark the location with masking tape to help align the piece once the backing film has been removed (figure 2b).

3. Peel back about an inch of backing film from one end of each of the three pieces of double-sided tape on the bottom (figure 3a). Position Hood Scoop over the vent and place on the vehicle. Peel the tape backing from between the tape and the vehicle, allowing the tape to contact the vehicle (figure 3b). Apply pressure to all tape attachment areas to ensure good adhesion (figure 3c).
