

Door Recess Guards

1. Installation should be done when temperature is between 65° - 110° F (18°-43° C). Clean mounting surface with rubbing alcohol. Avoid areas to which the product will not be adhered. **THIS MUST BE DONE FOR ADHESIVE TAPE TO PROPERLY STICK. FAILURE TO CLEAN COULD RESULT IN POOR ATTACHMENT AND FAILURE OF PRODUCT TO STAY ATTACHED.** Allow areas to dry completely before attaching door handles.
2. Test fit the Door Recess Guard to the vehicle before removing the plastic backing film. This will aid in aligning the piece properly before securing with the two sided 3M® tape. It will be necessary to rotate the Door Recess Guard in the recess until the best fit is achieved, as the recess is not symmetrical. Remove plastic backing film from the affixed two sided 3M® tape on the inside of one Door Recess Guard. The plastic film can be removed easier with the aid of a knife or cutting blade. Remove the two parallel strips of backing from the double-sided tape on the inside of the Door Recess Guard completely while only peeling back about an inch of backing from each end of the double-sided tape around the perimeter.

3. Position Door Recess Guard in the door recess. Peel tape backing from perimeter tape. Apply pressure to all tape attachment areas to ensure good adhesion.

4. Repeat steps 1-3 for all door handles.

Note - Do not wash vehicle for 24 hours following installation.
